“The speech referred to relativity
reconstructs the emergence of truths or forms,
Continuous layers of cause and effect, restores the solidarities forgotten.
But our thinking is so short, our freedom so submissive, our speech so repetitive,
That it is very necessary we realize that at the end, this shadow of a bottom has to be a sea for drinking"
Michel Foucault

abbau-trace

Jacques Derrida discovers, thematizes and conceptualizes life as fingerprints, as dust, as ghosts. In this sense he thinks the spectral phenomena, the erasing that happens before that happens, the disappearance at the heart of the emergence of phenomena, the ashes as "essence" without essence of matter. This materiality requires then that the concept of reality has to be thought again, and that history and temporality has to be preceded by the spectral phenomena. Traces of life as being-in-deconstruction.

The disappearance from the nucleus of the appearance of phenomena is what happens in this piece. The degradation of the elements just born, the moment of appearance is the moment of disappearance, erosion.
Besides that state of degradation, the glissandos has the function of twisting, stretching, displacing the structure, this eventually degrade the trace of the gesture, the trace of the spectrum ...
